

Relay Conferencing Captioning (RCC) – Mobile

If you are a deaf or hard-of-hearing Federal employee that needs to participate in a teleconference call while on the go, Federal Relay Conference Captioning – Mobile (FedRCC - Mobile) is your answer.

FedRCC - Mobile is a wireless application that provides secure real-time text of your teleconference call to your BlackBerry® or Windows™-enabled Smartphone device. You can download mobileRCC at <http://mobilercc.sprintrelay.com> on your mobile device, sign in, and you're all set!

To view a live demonstration, open the MobileRCC application and enter 999999999 for Event ID on the login screen. FedRCC - Mobile is a data-intensive application, so it is recommended that you check with your wireless provider regarding your data plan to ensure you will not incur any additional charges or fees. For more information, call Rex Moers at 866-607-4061, e-mail federalrelayoutreach@sprint.com, or visit www.fedrcc.us.

Note: Either you or the call "host" will need to place a request for FedRCC service at least 48 hours in advance (excluding weekend) at www.fedrcc.us.
